Notice for: 2017-2018 NCTA Fire Science Students

Good Afternoon,

I hope that all finds each of you well! I was reviewing data this afternoon and discovered that our NCTA Fire Science Students did not register for the Dual Credit for Skagit Valley College Credit.

Students participating in the education and training at NCTA have a great opportunity to jump start their education and career pathway through CTE Dual College Credit in many of our programs. CTE Dual Credit is a dual-enrollment program that allows high school students to take classes at the Northwest Career & Technical Academy campus and receive both high school and college career and technical education credit upon successful completion of course work at NCTA.

These are the courses students may earn credit to be transcribed at SVC:

- FIRE 102 Emergency Incident Management System (3 cr)
- FIRE 162 Hazardous Materials Awareness for Public Safety (1 cr)
- PE 200 First Aid, Safety, and CPR (2 cr)

Students can obtain these free college credits by earning a B or better in completing course work, meeting college-level course objectives, attending class and passing assessments.

It is advised that students that are either planning to continue their studies in the career pathway they're enrolled in with NCTA or if they are completing certificates at Skagit Valley College proceed with accepting these credits.

If students wish to have these credits processed on at Skagit Valley College, we need to know by Thursday, August 23. Students will need to go into the Statewide Enrollment and Reporting System (SERS) for CTE Dual credit and create an account and register for the Fire Science Classes. You can locate a How To document here:

<https://www.ctesers.org/docs/Students-1Pager.pdf>

Please let me know if you need assistance-- I am very familiar with this system and I am super happy to help.

Sorry for the late notice. I'm happy we caught this in time for those wishing to accept the credit.

Best,

Lynette
